

1. What types of control pins are needed in a microprocessor to regulate traffic on the bus, in order to prevent two devices from trying to use it at the same time?
A. Bus Control B. Interrupts
C. Status D. Bus arbitration
2. The fast carry or look-ahead carry circuit found in most 4-bit parallel-adder circuits
A. Add a 1 to complemented inputs
B. Reduce propagation delay
C. Determine sign and magnitude
D. Increases ripple delay
3. Both the CISC and RISC architectures have been developed to reduce the
A. Cost
B. Time delay
C. Semantic gap
D. All of the above
4. The part of machine level instruction which tells the central processor what has to be done, is
A. Operation code B. Address
C. Locator D. Flip-Flop
5. Which of the following are executed directly by computers central processing unit?
A. Object code B. Java code
C. Machine code D. All of the above
6. First in First out (FIFO) scheduling is
A. Non-preemptive scheduling
B. Preemptive scheduling
C. Fair share scheduling
D. Deadline scheduling
7. Which one of the following is the deadlock avoidance algorithm?
A. Banker's algorithm
B. Round-robin algorithm
C. Elevator algorithm
D. Karn's algorithm
8. While working with MS-DOS, which command is used to restore files that were backed up using the BACKUP command?
A. Copy B. Disk copy
C. Restore D. Store
9. How will a class protect the code inside it?
A. Using access specifiers
B. Abstraction
C. Use of inheritance
D. All of the above
10. Which of the following concept is often expressed by the phrase One interface, multiple methods?
A. Abstraction B. Polymorphism
C. Inheritance D. Encapsulation
11. Which of the following type of class allows only one object of it to be created?
A. Virtual class B. Abstract class
C. Singleton Class D. Friend class
12. The model stipulates that the requirements be completely specified before the rest of the development can processed.
A. Waterfall
B. Rapid Application Development
C. Iterative Development
D. Incremental Development

13. Which of the following is not a factor in the failure of the system development projects?
 - A. Inadequate user involvement
 - B. Failure of system integration
 - C. Size of the company
 - D. All of the above
14. What is the purpose of POP3 protocol in the internet?
 - A. Browsing web pages
 - B. Sending e-mail
 - C. Receiving e-mail
 - D. Monitoring routers
15. Which of the following TCP/IP protocol is used to monitor IP gateway and the networks to which they attach?
 - A. SGMP
 - B. SUMP
 - C. Both A and B
 - D. FTP
16. Which is accurate statement for IP?
 - A. IP is a connectionless protocol
 - B. IP uses relational addressing
 - C. IP delivers data reliability
 - D. IP operates at layer 2
17. Which of the following abstract data types can be used to represent a many to many relations?
 - A. Tree only
 - B. Plex only
 - C. Graph only
 - D. Both B and C
18. If a node having two children is to be deleted from binary search tree, it is replaced by its.
 - A. In order predecessor
 - B. In order successor
 - C. Pre-order predecessor
 - D. Post-order predecessor
19. Abstract data types are best described as follow
 - A. Contextual model for a certain class of data structure
 - B. Graphical model for a certain class of data structure
 - C. Mathematical model for a certain class of data structure
 - D. All of the above
20. Entity relationship model comes under
 - A. Object based logical model
 - B. Record based logical model
 - C. Physical data model
 - D. None of the above
21. Bayesian classification is
 - A. A class of learning algorithm that tries to find an optimum classification of a set of examples using the probabilistic theory
 - B. Any mechanism employed by a learning hypothesis
 - C. An approach to the design of learning algorithms that is inspired by the fact that when people encounter new situations, they often explain them by reference to familiar experiences, adapting the explanation to fit the new situation
 - D. None of above
22. What ensure that once transaction changes are done, they cannot be undone or lost, even in the events of a system failure?
 - A. Atomicity
 - B. Consistency
 - C. Durability
 - D. Isolation

23. In practical applications, battery voltage
- Is restored as soon as disconnect occurs
 - Is lowered as the load increases
 - May be stored indefinitely
 - Will be reduced to zero as power is drawn
24. Analysis of any financial statement comprises
- Balance Sheet
 - P/L Account
 - Trading Account
 - All of the above
25. Which of the following is not a technique, tool or method of analysis and interpretation of financial statements?
- Ratio Analysis
 - Caching Analysis
 - Trend Analysis
 - Average Analysis
26. NEA white paper was published in.....
- B.S. 2061
 - B.S. 2062
 - B.S. 2063
 - B.S. 2068
27. Which is uncommon in power transmission system in Nepal?
- 11 Kv transmission
 - 35 Kv transmission
 - 66 Kv transmission
 - All of the above
28. What will be output of Binary expression of 1011 XOR 1111?
- 1010
 - 1111
 - 0100
 - 1011
29. The first microprocessor built was called
- 4004
 - 8008
 - 8080
 - 8800
30. Two input multiplexers would have
- 1 select line
 - 2 select line
 - 3 select line
 - 4 select line

ANSWER SHEET

1.D	2.B	3.C	4.A	5.D	6.A	7.A	8.C	9.A	10.B
11.C	12.A	13.C	14.C	15.C	16.A	17.D	18.B	19.C	20.A
21.A	22.C	23.B	24.D	25.B	26.C	27.B	28.C	29.A	30.A
